EDUCATION

PES University

Bachelor of Technology in Computer Science and Engineering (AI and ML)

Bangalore, India

2022-2026

- Coursework: Cloud Computing, LLMs, Big Data, Mathematics For Machine Learning, Algorithms and Optimizations in Machine Learning, Social Computing, Advanced Data Analytics, Deep Learning, Deep learning on Graphs
- GPA: 8.51/10

TECHNICAL SKILLS

Programming Languages: Python, C++, C, SQL, Java

Machine Learning: TensorFlow, PyTorch, Pandas, Numpy, Scikit-learn, HuggingFace, NLTK, Keras, Langchain

Cloud and Deployment: Azure, Git/GitHub, FastAPI, AstraDB, Docker

WORK EXPERIENCE

AI/ML Intern

TechEnhance

May 2024 - July 2024

- Designed and implemented generative AI solutions for diverse use cases, including video analytics and finance, using Azure OpenAI and various open-source LLMs.
- Contributed to the creation of intelligent RAG-based chatbots, enhancing user interaction and reducing manual effort by 50 percent.

PROJECTS

LLM-Powered Topic Modelling and Graph-Based Insights from Research Abstracts - [GitHub](#)

Python, BERT, LLMs

- Implemented a topic modeling pipeline leveraging KeyBERT, Llama2, MMR, with clustering techniques like UMAP and HDBSCAN for dimensionality reduction and topic extraction.
- Built and analyzed topic similarity graphs using network analytics, including community detection, betweenness centrality, and k-core decomposition, to identify key insights and dense subgraphs.

PaperReviewer AI – SmartResearch using AI Agents - [GitHub Link](#)

Python, CrewAI, FastAPI

- Developed a full-stack research assistant using CrewAI multi-agent orchestration with specialized SearchAgent and SummaryAgent, integrating Google Gemini 2.5 Flash LLM for automated paper discovery and structured analysis from arXiv, enabling real-time summarization of 500+ research abstracts.

TextIQ - AI-Driven Content Enhancement Platform - [GitHub Link](#)

Python, Gemini-2.5, React

- Built a versatile AI-driven productivity platform integrating tone-adaptive text rewriting, interactive QA with document upload support, and automated PowerPoint generation with customizable slides and speaker notes, cutting presentation preparation time by 50 percent.

SmartSaver-AI Finance Management - [GitHub](#)

Gemini-Vision, PostgreSQL, Next.js

- Developed a full-stack finance application with AI receipt scanning using Gemini-Vision for automatic transaction extraction from images, intelligent expense categorization, and personalized financial advisory chatbot that analyzes spending patterns to provide tailored budgeting recommendations.

CERTIFICATIONS

Machine Learning A-Z - Udemy

Keras and TensorFlow for Deep Learning - Scaler

HONORS & AWARDS

1st Place - Hack-AI Analytics Hackathon 2024

2nd Place - Flipr AI/ML Hackathon 2025

7th Place - Neuronex ML Datathon 2023

CNR & DAC Scholarship Awardee
